For dullards only.

This book is absurdly obvious. Like "work area should be well illuminated". Oh really? I did not know that. What would have been better is: For X type of work area, should be lit to Y luminous units of measurement. The Practice tests are similarly written. This is like an introductory guide. I'm sorry but at this price ( I paid well over 100\$ ) I need more. Very disappointed in my professor.
