Not bad

By Dee

It does have a pretty good list of names - but not sure why the boy and girl names are not separated. It is not exhaustive as such but has a good list from which one can surely short-list a few names. We did pick our boy's name from this book!

2 of 2 people found the following review helpful.

so-so

By ndeye

We bought this book thinking that it might be a nice resource for picking an Indian baby name in the United States, but it fell short of our expectations (which is sort of my own fault--the book clearly states that its target audience is Indians living in India). The phonetic descriptions and ease-of-pronunciation ratings are such great ideas! This is really what convinced me to buy the book. However, it simply doesn't contain that many names to choose from. And even though the names are supposedly vetted for international use, there

are still many that would raise eyebrows with an American audience (e.g. naming your kid "Ashit" or any number of variations thereof). Plus the book took more than a month to arrive after we ordered it.

Overall, it was nice to have a book to look through, but not that useful for our particular situation.

Not the last name resource you will need, but a good start

By Jacob S.

I bought this to consider Indian names for my first child. I am American and my wife is Southern Indian. While this has been a good *starter* list for discussion, it is mostly northern indian names and includes several western names. The pronunciation guide (stars to indicate how easy it is for a normal western tongue) is a nice feature. I am glad I bought it but might have trouble finding the exact name we need in it.
