Review

The second edition of Theory for Today's Musician is indeed apropos for today's music student, and is an improvement on an already well-designed theory text. The book offers a logical and thorough presentation of music theory concepts, leaving no stone unturned. One of its greatest attributes, musical examples are drawn not only from the standard classical repertoire, but from musical theater, popular music, traditional tunes, and jazz, so the book is relevant for any musician, regardless of specialization.

--Eric Alexander, University of Northern Colorado

Theory for Today's Musician by Ralph Turek is a clearly-written, easy-to-follow textbook for students. The author's use of creative analogies and musical examples taken from a variety of genres and styles, combined with a bit of humor, will undoubtedly help students connect with a subject that too often seems distant and difficult to them.

--Vicki Curry, James Madison University

I have found that this textbook helps students understand important musical concepts by making connections between classical, jazz, and popular music. The authors use familiar sounds to help the students grasp traditional principles. This textbook has been especially helpful for our music education majors who must pass a state-wide standardized exam that includes jazz and popular music. The integration of lead sheet symbols with traditional figured bass symbols has given our students the skills they need to succeed in today's musical environment.

-Randy Earles, Idaho State University

Theory for Today's Musician's carefully considered musical examples, drawn proportionately from

"classical" and popular genres, clearly demonstrates the theoretical concepts students struggle to understand. Turek's entertaining writing encourages even the most reluctant student to read the text. The text encourages students to think creatively and actively. As a result, students learn to use their ears and then understand the "rules" of music theory. This should be the standard among theory textbooks.

--David Hanan, University of Central Oklahoma

This updated edition of *Theory for Today's Musician* will be popular with both students and teachers. The writing style is clear and direct, the musical examples are selected from standard "classical" repertoire as well as popular tunes, and the student exercises are varied, creative, and well thought out. The chapters on song writing and jazz will help to create a well-rounded student with a solid foundation in music theory. The Turek text will be a great addition to the theory classroom.

--Leslie Odom, University of Florida

Ralph Turek hones *Theory for Today's Musician* for the 21st-century student by using straightforward and concise writing, new and clear examples from classics to jazz and beyond, combined with abundant drills and exercises for student mastery throughout the text and the workbook.

--Elaine Rendler, George Mason University

Theory for Today's Musician's engaging writing style sparks the imagination and curiosity of students and encourages them to read on their own. It approaches music theory in such a way that the concepts and terminology covered may be applied equally well across a wide range of musical styles, and its well-placed examples demonstrate over and over again how useful these concepts can be to understanding and performing music, regardless of whether that music is by Bach, Beethoven, Bartók, or Brubeck.

--Matt Santa, Texas Tech University

Theory for Today's Musician, Second Edition, recasts the scope of the traditional music theory course to meet the demands of the professional music world, in a style that speaks directly and engagingly to today's music student. It uses classical, folk, popular, and jazz repertoires with clear explanations that link music theory to musical applications. The authors help prepare students by not only exploring how music theory works in art music, but how it functions within modern music, and why this knowledge will help them become better composers, music teachers, performers, and recording engineers.

This broadly comprehensive text merges traditional topics such as part-writing and harmony (diatonic, chromatic, neo-tonal and atonal), with less traditional topics such as counterpoint and musical process, and includes the non-traditional topics of popular music songwriting, jazz harmony and the blues.
