Introductory philosophy courses often present a dilemma for instructors: does one select a number of "classic" texts, and treat them in detail, or does one use a survey of such texts and attempt to touch briefly upon a variety of subject areas? Both methods have their deficiencies and advantages, but the present text should serve as an excellent choice for those electing to take the survey approach. Cottingham (philosophy, Univ. of Reading) has divided philosophical enquiry into ten broad categories and within each category chosen ten excerpts from major writers to illustrate the range of thinking within each category. This is far more than a "Greatest Hits of Philosophy," however. The selections have been carefully chosen from a broad range of writers that includes Plato, Aristotle, Descartes, Locke, Hume, Kant, Mill, Nietzsche, Strawson, Popper, Rawls, and Tolstoy. The texts have been updated where the editor felt the language to be archaic or unclear, and the selections appropriately illustrate the breadth and depth of each category of philosophical activity. At the end of the book are brief biographies of each philosopher excerpted. Together with a good survey history of philosophy such as *The Oxford History of Western Philosophy* (LJ 9/1/94), this text would be ideal for an introductory course or program. The one caveat is the price of the hardcover edition; libraries may opt for it, but students would be better off with the paperback. Recommended for all public and academic libraries. Terry C. Very condensed and infomative reference book.

By A Customer

This book is a God send. It covers all the major figures of Western Philosophy and their thoughts on various subjects central to philosophy. As a student of philosophy this is a great compilation and reference book. This will help manage all the minutia of thought from the major philospers; just simple reminders of where they are coming from and where they intend to conclude.

Great intro book for survey courses, but not for deeper scholarship

By Matthew T. Weflen

I give this book 5 stars because it is exactly what it sets out to be - a comprehensive introduction to the great thinkers of Western Philosophy, broken into subject categories (i.e. the mind, free will, ultimate reality, etc.), with small excerpts from each thinker to portray their thinking on said subject. Thinkers in each category range from Ancient Greek to the 20th century, making for a nice sweep of the history of the topic. Cottingham's introductions to each excerpt are lucid and helpful to the the neophyte, though they are quite

concise.

As a 100-level survey course textbook, you can't go wrong. If you really want to dig deeper into any of the individual thinkers, though, you'll need more specialized texts. This is what it says - an anthology only.
